# Harpsicle® Harps

Harpsicle® harps were designed by world renowned harp maker William Rees. Rees Concert Lever Harps have been used on Grammy winning CD's by professional harpists working with Paul Winters and YoYo Ma, soundtracks in Hollywood movies and concert settings from the Lincoln Center, Kennedy Center and the White House to St Patricks Cathedral, Ireland and performances in Hong Kong, China. In 2003, William introduced what has become the best selling harp in the world, the very unique and inexpensive Harpsicle® Brand Harp. Harpsicle® harps have won praise from both amateurs and professionals. Harpsicle® harps are individually handmade in the U.S.A.. Harpsicle® harps have 26 strings and weigh only 4 1/2 pounds. Well designed and sturdily built they have the string spacing and action which make them an excellent selection for both the first-time harper and the experienced player. Harpsicle® harps fit in the overhead storage of most airliners and are even light enough to be comfortably played while standing or walking. These harps have nice volume and tone and they maintain tune as soundly as any professional harp. Harpsicle® harps are recommended by the International Harp Therapy Program, the Bedside Harp Program, university professors and harp teachers around the world including the Irish Harp Center in Shannon, Ireland. These great little harps are found in the finest harp stores all over the world.

🌀 Colors Available: Black, White, Blue, Green, Yellow, Orange, Red, Pink, Purple, and Maple 🌀 All Harpsicle® Brand Harps come with a tuning wrench.
